FACILITATOR CARDS

You are given 10 facilitator cards, which include stories players will work on and facilitation instructions. Randomize and draw one for each round of the game.

STORY 01 / LOCAL LIFE — **FACILITATOR CARD**

STEP 1: INTRODUCE THE STORY

Tell players which story they are working on. Read the story and questions aloud.

Transit proposal would redraw three bus routes

Officials release a complicated proposal two days before a public hearing. Riders need to understand how their commutes may change.

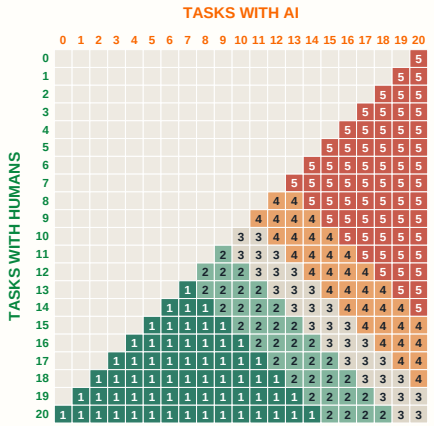

WHAT MATTERS HERE
Make the plan useful quickly without overlooking neighborhoods that could lose service.

DISCUSS BEFORE ASSIGNING

- Where could AI make a complicated route proposal easier to use?
- What might automated analysis miss about how residents actually travel?
- Which audience questions would require human judgment?

STEP 2: CALCULATE AI DEPENDENCE

1. Count tasks involving humans: Human or Human + AI. This is the row.
2. Count tasks involving AI: AI or Human + AI. This is the column.
3. **The number where row and column meet is the AI dependence score.**

STEP 3: CALCULATE AUDIENCE OUTCOMES

A. SET THE BASELINE AUDIENCE SCORES

Use each player or team's AI dependence score:

AI DEPENDENCE	1	2	3	4	5
REACH	VERY LOW	LOW	AVERAGE	HIGH	VERY HIGH
TRUST	VERY HIGH	HIGH	AVERAGE	LOW	VERY LOW

B. TELL PLAYERS THEIR BASELINE. DISCUSS:

Does it match expectations? What does this baseline assume about AI, Reach, and Trust?

C. APPLY THIS STORY'S BONUSES AND PENALTIES

Not all stories are the same. For each matching assignment, move the named outcome one level.

- **IF Format Adaptation = AI or Human + AI: UPGRADE REACH ONE LEVEL.**
  Audience reason: Multiple formats help riders find the changes that affect them.
- **IF Data Gathering & Analysis = AI only: DOWNGRADE TRUST ONE LEVEL.**
  Audience reason: Unreviewed route analysis may miss local travel patterns.
- **IF Community Management = Human or Human + AI: UPGRADE TRUST ONE LEVEL.**
  Audience reason: Human attention helps address riders' specific questions.

FINAL REACH _____ **FINAL TRUST** _____

D. TELL PLAYERS THE FINAL RESULT. DISCUSS: Which effect changed it? Does it fit this story?

CUT

STORY 02 / CLIMATE — **FACILITATOR CARD**

STEP 1: INTRODUCE THE STORY

Tell players which story they are working on. Read the story and questions aloud.

Flood warning issued after overnight rain

Water is rising in several neighborhoods. Conditions and road closures are changing throughout the morning.

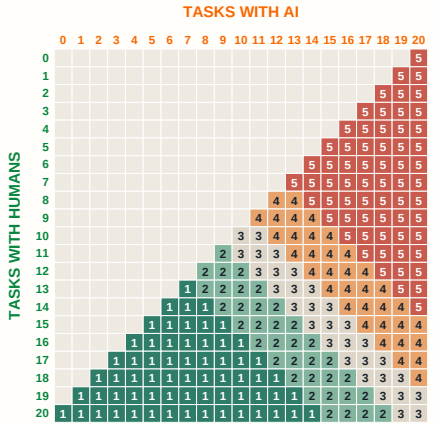

WHAT MATTERS HERE
Reach people quickly while keeping urgent information accurate and current.

DISCUSS BEFORE ASSIGNING

- Where could AI help urgent information reach people faster?
- Which errors would create the greatest immediate harm?
- Who should decide which updates deserve the most attention?

STEP 2: CALCULATE AI DEPENDENCE

1. Count tasks involving humans: Human or Human + AI. This is the row.
2. Count tasks involving AI: AI or Human + AI. This is the column.
3. **The number where row and column meet is the AI dependence score.**

STEP 3: CALCULATE AUDIENCE OUTCOMES

A. SET THE BASELINE AUDIENCE SCORES

Use each player or team's AI dependence score:

AI DEPENDENCE	1	2	3	4	5
REACH	VERY LOW	LOW	AVERAGE	HIGH	VERY HIGH
TRUST	VERY HIGH	HIGH	AVERAGE	LOW	VERY LOW

B. TELL PLAYERS THEIR BASELINE. DISCUSS:

Does it match expectations? What does this baseline assume about AI, Reach, and Trust?

C. APPLY THIS STORY'S BONUSES AND PENALTIES

Not all stories are the same. For each matching assignment, move the named outcome one level.

- **IF Social Distribution = AI or Human + AI: UPGRADE REACH ONE LEVEL.**
  Audience reason: Rapid distribution helps urgent information travel.
- **IF Fact Checking = AI only: DOWNGRADE TRUST ONE LEVEL.**
  Audience reason: An unreviewed mistake can create immediate harm.
- **IF Content Selection = Human or Human + AI: UPGRADE TRUST ONE LEVEL.**
  Audience reason: Editorial judgment keeps the most urgent updates prominent.

FINAL REACH _____ **FINAL TRUST** _____

D. TELL PLAYERS THE FINAL RESULT. DISCUSS: Which effect changed it? Does it fit this story?

FACILITATOR CARDS

You are given 10 facilitator cards, which include stories players will work on and facilitation instructions. Randomize and draw one for each round of the game.

STORY 03 / GOVERNMENT — **FACILITATOR CARD**

STEP 1: INTRODUCE THE STORY

Tell players which story they are working on. Read the story and questions aloud.

Council prepares to vote on new housing rules

The proposal has changed several times and interest groups disagree about who would benefit. A final vote is expected tonight.

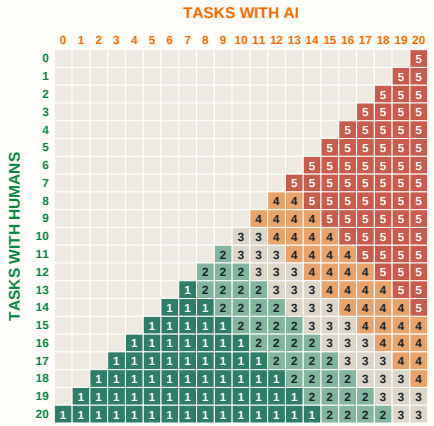

WHAT MATTERS HERE
Explain the policy and competing claims without reducing a complex debate to slogans.

DISCUSS BEFORE ASSIGNING

- Where could AI help compare several versions of the proposal?
- Which parts of fairness and impact require contextual judgment?
- Which contested claims need direct human verification?

STEP 2: CALCULATE AI DEPENDENCE

1. Count tasks involving humans: Human or Human + AI. This is the row.
2. Count tasks involving AI: AI or Human + AI. This is the column.
3. **The number where row and column meet is the AI dependence score.**

STEP 3: CALCULATE AUDIENCE OUTCOMES

A. SET THE BASELINE AUDIENCE SCORES

Use each player or team's AI dependence score:

AI DEPENDENCE	1	2	3	4	5
REACH	VERY LOW	LOW	AVERAGE	HIGH	VERY HIGH
TRUST	VERY HIGH	HIGH	AVERAGE	LOW	VERY LOW

B. TELL PLAYERS THEIR BASELINE. DISCUSS:

Does it match expectations? What does this baseline assume about AI, Reach, and Trust?

C. APPLY THIS STORY'S BONUSES AND PENALTIES

Not all stories are the same. For each matching assignment, move the named outcome one level.

- **IF Document Review = AI or Human + AI: UPGRADE REACH ONE LEVEL.**
  Audience reason: Fast comparison helps surface changes across drafts.
- **IF Bias & Fairness Review = AI only: DOWNGRADE TRUST ONE LEVEL.**
  Audience reason: Fairness requires contextual judgment about affected groups.
- **IF Fact Checking = Human or Human + AI: UPGRADE TRUST ONE LEVEL.**
  Audience reason: Human review strengthens confidence in contested claims.

FINAL REACH _____ FINAL TRUST _____

D. TELL PLAYERS THE FINAL RESULT. DISCUSS: Which effect changed it? Does it fit this story?

CUT

STORY 04 / PUBLIC HEALTH — **FACILITATOR CARD**

STEP 1: INTRODUCE THE STORY

Tell players which story they are working on. Read the story and questions aloud.

Clinics report an increase in respiratory illness

Several clinics report similar symptoms, but public health officials have not identified a cause. Readers are asking what they should do.

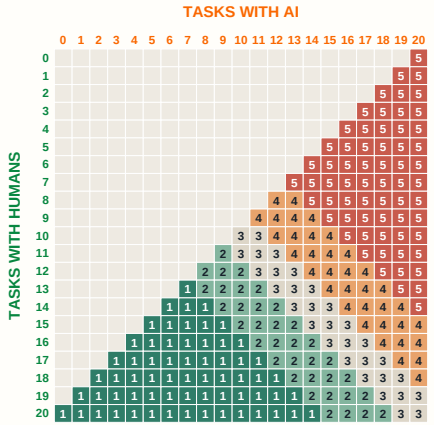

WHAT MATTERS HERE
Provide useful guidance without overstating uncertain evidence.

DISCUSS BEFORE ASSIGNING

- Where could AI help locate relevant guidance and expertise?
- How could automated writing overstate uncertain evidence?
- Which health claims need the strongest human verification?

STEP 2: CALCULATE AI DEPENDENCE

1. Count tasks involving humans: Human or Human + AI. This is the row.
2. Count tasks involving AI: AI or Human + AI. This is the column.
3. **The number where row and column meet is the AI dependence score.**

STEP 3: CALCULATE AUDIENCE OUTCOMES

A. SET THE BASELINE AUDIENCE SCORES

Use each player or team's AI dependence score:

AI DEPENDENCE	1	2	3	4	5
REACH	VERY LOW	LOW	AVERAGE	HIGH	VERY HIGH
TRUST	VERY HIGH	HIGH	AVERAGE	LOW	VERY LOW

B. TELL PLAYERS THEIR BASELINE. DISCUSS:

Does it match expectations? What does this baseline assume about AI, Reach, and Trust?

C. APPLY THIS STORY'S BONUSES AND PENALTIES

Not all stories are the same. For each matching assignment, move the named outcome one level.

- **IF Research & Source Discovery = AI or Human + AI: UPGRADE REACH ONE LEVEL.**
  Audience reason: Broader source discovery can quickly connect useful guidance.
- **IF News Writing = AI only: DOWNGRADE TRUST ONE LEVEL.**
  Audience reason: Automated drafting may state uncertain evidence too confidently.
- **IF Fact Checking = Human or Human + AI: UPGRADE TRUST ONE LEVEL.**
  Audience reason: Human verification helps preserve uncertainty and context.

FINAL REACH _____ FINAL TRUST _____

D. TELL PLAYERS THE FINAL RESULT. DISCUSS: Which effect changed it? Does it fit this story?

FACILITATOR CARDS

You are given 10 facilitator cards, which include stories players will work on and facilitation instructions. Randomize and draw one for each round of the game.

STORY 05 / SCHOOLS — **FACILITATOR CARD**

STEP 1: INTRODUCE THE STORY

Tell players which story they are working on. Read the story and questions aloud.

District considers changing school start times

The proposal affects transportation, after-school programs, family schedules, and student sleep. The district will hold listening sessions.

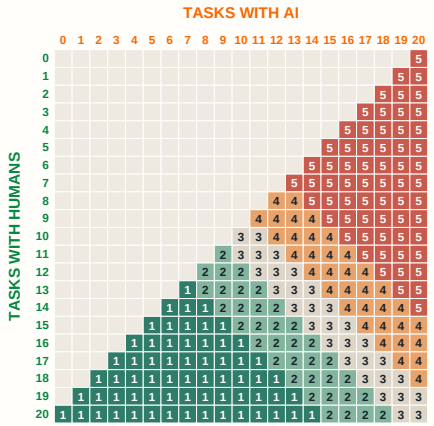

WHAT MATTERS HERE
Represent the people affected and explain consequences across the community.

DISCUSS BEFORE ASSIGNING

- Which personal accounts could lose meaning through automation?
- Could AI help reach families with different information needs?
- Which community concerns require a person to respond?

STEP 2: CALCULATE AI DEPENDENCE

1. Count tasks involving humans: Human or Human + AI. This is the row.
2. Count tasks involving AI: AI or Human + AI. This is the column.
3. **The number where row and column meet is the AI dependence score.**

STEP 3: CALCULATE AUDIENCE OUTCOMES

A. SET THE BASELINE AUDIENCE SCORES

Use each player or team's AI dependence score:

AI DEPENDENCE	1	2	3	4	5
REACH	VERY LOW	LOW	AVERAGE	HIGH	VERY HIGH
TRUST	VERY HIGH	HIGH	AVERAGE	LOW	VERY LOW

B. TELL PLAYERS THEIR BASELINE. DISCUSS:

Does it match expectations? What does this baseline assume about AI, Reach, and Trust?

C. APPLY THIS STORY'S BONUSES AND PENALTIES

Not all stories are the same. For each matching assignment, move the named outcome one level.

- **IF Interview Processing = Human or Human + AI: UPGRADE TRUST ONE LEVEL.**
  Audience reason: Review protects nuance in students' and families' accounts.
- **IF Audience Targeting = AI or Human + AI: UPGRADE REACH ONE LEVEL.**
  Audience reason: Targeting can reach families with different information needs.
- **IF Community Management = AI only: DOWNGRADE TRUST ONE LEVEL.**
  Audience reason: Automated responses can mishandle personal concerns.

FINAL REACH _____ **FINAL TRUST** _____

D. TELL PLAYERS THE FINAL RESULT. DISCUSS: Which effect changed it? Does it fit this story?

CUT

STORY 06 / LOCAL LIFE — **FACILITATOR CARD**

STEP 1: INTRODUCE THE STORY

Tell players which story they are working on. Read the story and questions aloud.

Small businesses face a new permit deadline

A new online filing process begins next week. Some owners say the instructions are confusing and available only in English.

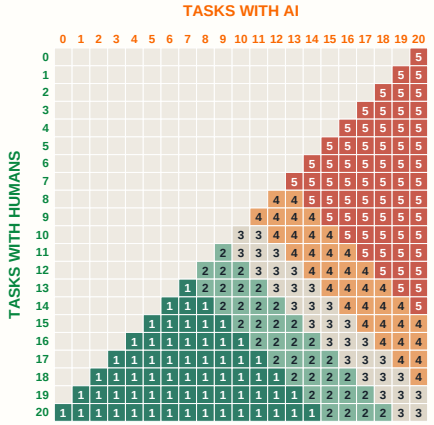

WHAT MATTERS HERE
Make the requirements accessible to the people who need to act.

DISCUSS BEFORE ASSIGNING

- Could AI make the permit instructions easier to summarize or translate?
- Which formats would help owners find and use the information?
- What language or access barriers might automation overlook?

STEP 2: CALCULATE AI DEPENDENCE

1. Count tasks involving humans: Human or Human + AI. This is the row.
2. Count tasks involving AI: AI or Human + AI. This is the column.
3. **The number where row and column meet is the AI dependence score.**

STEP 3: CALCULATE AUDIENCE OUTCOMES

A. SET THE BASELINE AUDIENCE SCORES

Use each player or team's AI dependence score:

AI DEPENDENCE	1	2	3	4	5
REACH	VERY LOW	LOW	AVERAGE	HIGH	VERY HIGH
TRUST	VERY HIGH	HIGH	AVERAGE	LOW	VERY LOW

B. TELL PLAYERS THEIR BASELINE. DISCUSS:

Does it match expectations? What does this baseline assume about AI, Reach, and Trust?

C. APPLY THIS STORY'S BONUSES AND PENALTIES

Not all stories are the same. For each matching assignment, move the named outcome one level.

- **IF Story Summarization = AI or Human + AI: UPGRADE REACH ONE LEVEL.**
  Audience reason: A concise checklist makes the requirements easier to use.
- **IF Format Adaptation = AI or Human + AI: UPGRADE REACH ONE LEVEL.**
  Audience reason: Multiple formats can reach owners across platforms.
- **IF Bias & Fairness Review = AI only: DOWNGRADE TRUST ONE LEVEL.**
  Audience reason: Automated review may miss language and access barriers.

FINAL REACH _____ **FINAL TRUST** _____

D. TELL PLAYERS THE FINAL RESULT. DISCUSS: Which effect changed it? Does it fit this story?

FACILITATOR CARDS

You are given 10 facilitator cards, which include stories players will work on and facilitation instructions. Randomize and draw one for each round of the game.

STORY 07 / CLIMATE — **FACILITATOR CARD**

STEP 1: INTRODUCE THE STORY

Tell players which story they are working on. Read the story and questions aloud.

City opens cooling centers during a heat emergency

Temperatures are expected to remain dangerous for three days. Hours, transportation, and capacity differ among locations.

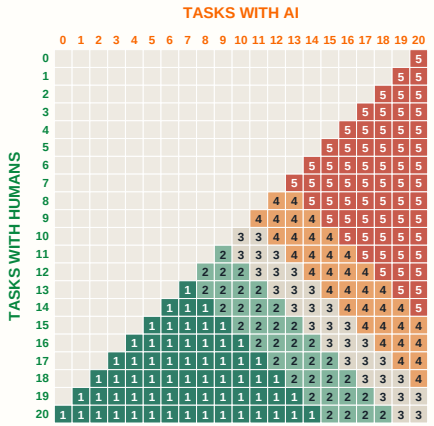

WHAT MATTERS HERE
Distribute accurate, accessible information to residents at greatest risk.

DISCUSS BEFORE ASSIGNING

- Where could AI help residents locate cooling centers quickly?
- Which mistakes in maps or hours could create safety risks?
- What information should a person verify before publication?

STEP 2: CALCULATE AI DEPENDENCE

1. Count tasks involving humans: Human or Human + AI. This is the row.
2. Count tasks involving AI: AI or Human + AI. This is the column.
3. **The number where row and column meet is the AI dependence score.**

STEP 3: CALCULATE AUDIENCE OUTCOMES

A. SET THE BASELINE AUDIENCE SCORES

Use each player or team's AI dependence score:

AI DEPENDENCE	1	2	3	4	5
REACH	VERY LOW	LOW	AVERAGE	HIGH	VERY HIGH
TRUST	VERY HIGH	HIGH	AVERAGE	LOW	VERY LOW

B. TELL PLAYERS THEIR BASELINE. DISCUSS:

Does it match expectations? What does this baseline assume about AI, Reach, and Trust?

C. APPLY THIS STORY'S BONUSES AND PENALTIES

Not all stories are the same. For each matching assignment, move the named outcome one level.

- **IF Search Optimization = AI or Human + AI: UPGRADE REACH ONE LEVEL.**
  Audience reason: Search visibility helps residents find locations quickly.
- **IF Visual Creation = AI only: DOWNGRADE TRUST ONE LEVEL.**
  Audience reason: Generated maps may introduce dangerous location errors.
- **IF Fact Checking = Human or Human + AI: UPGRADE TRUST ONE LEVEL.**
  Audience reason: Human review confirms locations, hours, and transportation.

FINAL REACH _____ FINAL TRUST _____

D. TELL PLAYERS THE FINAL RESULT. DISCUSS: Which effect changed it? Does it fit this story?

CUT

STORY 08 / GOVERNMENT — **FACILITATOR CARD**

STEP 1: INTRODUCE THE STORY

Tell players which story they are working on. Read the story and questions aloud.

Public records reveal delays in safety inspections

Records show a growing backlog, but agencies dispute how the delays should be measured and whether residents were placed at risk.

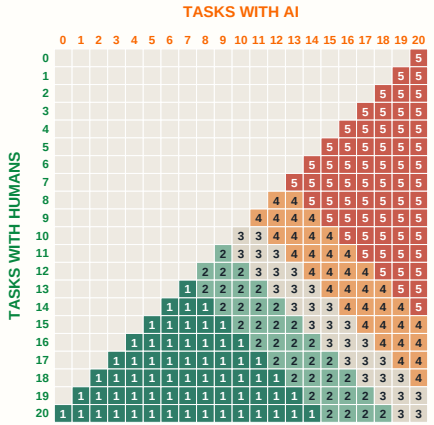

WHAT MATTERS HERE
Build defensible conclusions from incomplete records and competing explanations.

DISCUSS BEFORE ASSIGNING

- Where could AI help process a large collection of public records?
- How could an automated definition of delay distort the findings?
- Which conclusions require human judgment about the evidence?

STEP 2: CALCULATE AI DEPENDENCE

1. Count tasks involving humans: Human or Human + AI. This is the row.
2. Count tasks involving AI: AI or Human + AI. This is the column.
3. **The number where row and column meet is the AI dependence score.**

STEP 3: CALCULATE AUDIENCE OUTCOMES

A. SET THE BASELINE AUDIENCE SCORES

Use each player or team's AI dependence score:

AI DEPENDENCE	1	2	3	4	5
REACH	VERY LOW	LOW	AVERAGE	HIGH	VERY HIGH
TRUST	VERY HIGH	HIGH	AVERAGE	LOW	VERY LOW

B. TELL PLAYERS THEIR BASELINE. DISCUSS:

Does it match expectations? What does this baseline assume about AI, Reach, and Trust?

C. APPLY THIS STORY'S BONUSES AND PENALTIES

Not all stories are the same. For each matching assignment, move the named outcome one level.

- **IF Document Review = AI or Human + AI: UPGRADE REACH ONE LEVEL.**
  Audience reason: Assisted review can process a large record set.
- **IF Data Gathering & Analysis = AI only: DOWNGRADE TRUST ONE LEVEL.**
  Audience reason: Unreviewed analysis may encode a misleading definition of delay.
- **IF News Writing = Human or Human + AI: UPGRADE TRUST ONE LEVEL.**
  Audience reason: Human judgment helps match the claims to the evidence.

FINAL REACH _____ FINAL TRUST _____

D. TELL PLAYERS THE FINAL RESULT. DISCUSS: Which effect changed it? Does it fit this story?

FACILITATOR CARDS

You are given 10 facilitator cards, which include stories players will work on and facilitation instructions. Randomize and draw one for each round of the game.

STORY 09 / PUBLIC HEALTH — **FACILITATOR CARD**

STEP 1: INTRODUCE THE STORY

Tell players which story they are working on. Read the story and questions aloud.

Hospital changes its emergency intake process

The hospital says a new system will reduce waiting times. Nurses raise concerns about how patients will be prioritized.

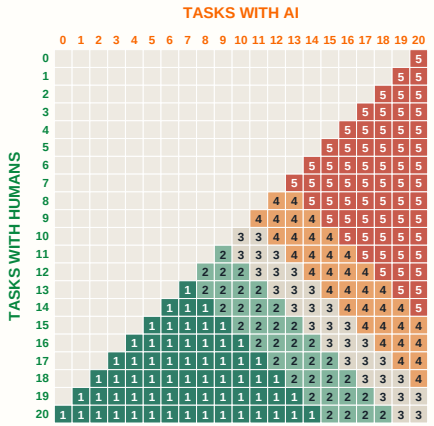

WHAT MATTERS HERE
Explain the practical change while examining claims made by both management and staff.

DISCUSS BEFORE ASSIGNING

- Which staff and patient accounts require careful human review?
- Could automated promotion repeat claims that have not been tested?
- Where could AI help patients find the new instructions?

STEP 2: CALCULATE AI DEPENDENCE

1. Count tasks involving humans: Human or Human + AI. This is the row.
2. Count tasks involving AI: AI or Human + AI. This is the column.
3. **The number where row and column meet is the AI dependence score.**

STEP 3: CALCULATE AUDIENCE OUTCOMES

A. SET THE BASELINE AUDIENCE SCORES

Use each player or team's AI dependence score:

AI DEPENDENCE	1	2	3	4	5
REACH	VERY LOW	LOW	AVERAGE	HIGH	VERY HIGH
TRUST	VERY HIGH	HIGH	AVERAGE	LOW	VERY LOW

B. TELL PLAYERS THEIR BASELINE. DISCUSS:

Does it match expectations? What does this baseline assume about AI, Reach, and Trust?

C. APPLY THIS STORY'S BONUSES AND PENALTIES

Not all stories are the same. For each matching assignment, move the named outcome one level.

- **IF Interview Processing = Human or Human + AI: UPGRADE TRUST ONE LEVEL.**
  Audience reason: Review protects nuance in staff and patient accounts.
- **IF Story Promotion = AI only: DOWNGRADE TRUST ONE LEVEL.**
  Audience reason: Automated promotion may repeat an untested efficiency claim.
- **IF Search Optimization = AI or Human + AI: UPGRADE REACH ONE LEVEL.**
  Audience reason: Search visibility helps patients find the new instructions.

FINAL REACH _____ **FINAL TRUST** _____

D. TELL PLAYERS THE FINAL RESULT. DISCUSS: Which effect changed it? Does it fit this story?

CUT

STORY 10 / ELECTIONS — **FACILITATOR CARD**

STEP 1: INTRODUCE THE STORY

Tell players which story they are working on. Read the story and questions aloud.

False polling-place information spreads online

Posts list incorrect voting locations and times. Election officials have issued a correction, but the false posts continue to circulate.

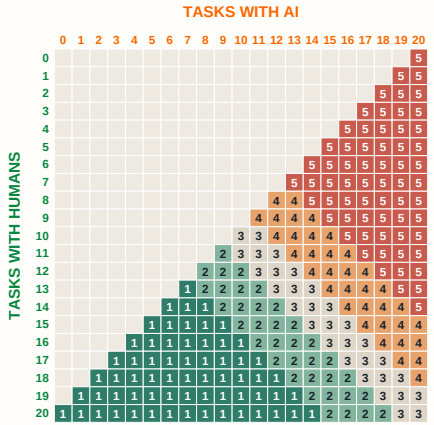

WHAT MATTERS HERE
Correct misinformation quickly without amplifying it or confusing voters further.

DISCUSS BEFORE ASSIGNING

- Where could AI help distribute a correction quickly?
- How might automation accidentally amplify the false information?
- Which details must be checked against official records?

STEP 2: CALCULATE AI DEPENDENCE

1. Count tasks involving humans: Human or Human + AI. This is the row.
2. Count tasks involving AI: AI or Human + AI. This is the column.
3. **The number where row and column meet is the AI dependence score.**

STEP 3: CALCULATE AUDIENCE OUTCOMES

A. SET THE BASELINE AUDIENCE SCORES

Use each player or team's AI dependence score:

AI DEPENDENCE	1	2	3	4	5
REACH	VERY LOW	LOW	AVERAGE	HIGH	VERY HIGH
TRUST	VERY HIGH	HIGH	AVERAGE	LOW	VERY LOW

B. TELL PLAYERS THEIR BASELINE. DISCUSS:

Does it match expectations? What does this baseline assume about AI, Reach, and Trust?

C. APPLY THIS STORY'S BONUSES AND PENALTIES

Not all stories are the same. For each matching assignment, move the named outcome one level.

- **IF Social Distribution = AI or Human + AI: UPGRADE REACH ONE LEVEL.**
  Audience reason: Fast distribution helps the correction reach voters.
- **IF Story Promotion = AI only: DOWNGRADE TRUST ONE LEVEL.**
  Audience reason: Automated promotion may repeat or amplify the false claim.
- **IF Fact Checking = Human or Human + AI: UPGRADE TRUST ONE LEVEL.**
  Audience reason: Human verification anchors the correction in official records.

FINAL REACH _____ **FINAL TRUST** _____

D. TELL PLAYERS THE FINAL RESULT. DISCUSS: Which effect changed it? Does it fit this story?
